

BARIX

AudioPoint license upgrade - 250 User

This document describes the process to order and receive an extended AudioPoint License. By default, an AudioPoint device comes with a 50 users license, which you can extend to a maximum of 250 users per device!

License Details

Name	Barix AudioPoint 250CL license upgrade to 250 simultaneous subscribers
Ordering NR:	2017.3135
Price	Contact your local Distributor at https://barix.com/buy

Order your License upgrade

Find your local distributor here: www.barix.com/buy

Order the AudioPoint License Update at the distributor, provide him with the **MAC-Address** of the device you want the license upgrade on! You can find the MAC Address at the back of your device or on the Web Interface (Top Right corner).

Receive your License upgrade

Once the license is issued and created, the device will download the license directly from the licensing server at the next startup. For that, the device needs to be **connected to the internet**. The current License of the device can be checked on the Status page on the Web Interface!

Alternatively, Barix can also provide the license as an update file, this needs to be requested upfront and cannot be requested afterwards.
